

Sharp Shape Scan Programs Installation Walkthrough

Copyright ©, All rights reserved, February 2012

This document is for customers who do not know much about computers. This document shows an example made from Microsoft Outlook Express on an XP PC. Please follow the graphics and comments to install the scan program.

Figure 1: Make a folder, for example TEMP, in your C-drive or on Desktop

Figure 2: Find the email that has the attached scan program. Paper-clip means attachment

Figure 3: Open the email and find the attached file – XEA.ZIP

Figure 4: Right-click attachment and click 'Save as'.

Figure 5: Browse (navigate) to the TEMP folder that was created in Figure 1. Click Save to save the file

Figure 6: Once it is saved, you should find the attachment there

Figure 7: Right-click XEA and choose Extract All...

Figure 8: Click Next

Figure 9: Choose default folder and click Next

Figure A: Click Finish

Figure B: In the TEMP folder, you should find a folder named XEA and a ZIP file named XEA. Look carefully at the difference. The second one on list is the ZIP file

Figure C: Open the XEA folder and you will see the above files. There are 3 files named SETUP, NEWSCAN.001 and NEWSCAN.002. Double click SETUP to launch the setup program

Figure D: Click Run

Figure E: Choose the default folder C:\ScanFeet (recommended), or for any reason, you can choose a different folder by clicking Change. Click Finish

Figure F: If it is a reinstall, you will see the message for over-write. Click Yes (several times) to over-write the older files. If it is a fresh install, you do not see the messages

Figure G: Click OK to finish up

Figure H: The installed program is shown in a folder as the above. You can create a shortcut to Desktop for easy access

Figure I: You can also find the program from Program List. You can create a shortcut to Desktop for easy access

Figure J: If you run the SETUP from a floppy disk or USB drive, you will see the above. Click OK

Figure K: Do not separate the SETUP and the other two files (NEWSCAN.001 and NEWSCAN.002). Otherwise, you will see the above

Notes: there are different email program. You need to know how to use your email program to save attachments. It is sometimes okay to launch the SETUP program from the attached ZIP file in the email, but it does not always work. So it is better to save the ZIP and extract the contents. The saved files can be accessed at a later time.
